Explanation of the calculation of the contribution schedule lot entitlements

For Central Apartments Sippy Downs Community Titles Scheme, the contribution schedule lot entitlements for each lot have been calculated using the relativity principle and based on the following relevant factors:-

1. The nature, features and characteristics of the lots

The lots have different natures, features, and characteristics. Not all lots are the same size. Not all lots are expected to have the same number of occupants. Not all lots will access the common property in the same way.

2. The impact the lots may have on the costs of maintaining the common property

The methodology used to vary the contribution schedule lot entitlements from a state of equality is as follows:-

1. Each lot's contribution schedule lot entitlement compared to the total contribution schedule lot entitlements is equivalent to that proportion of the cost that the lot is either:-
 - (a) causing the body corporate, or
 - (b) benefiting from the particular body corporate's expenditure.
2. The body corporate budget and sinking fund costs have been analysed and the expenditure categorized according to the cause / benefit rationale. Expenses that benefited all lots equally (eg secretarial fees, audit fees, printing, postage and outlays etc) were shared between the lots equally. Expenses that were caused by the size of the lot (for instance – painting and many other sinking fund items) were shared according to the size of the lot. Expenses that benefited only certain lots were shared according to that benefit.

Explanation of the calculation of the interest schedule lot entitlements

For Central Apartments Sippy Downs Community Title Scheme, the interest schedule lot entitlements for each lot have been calculated to reflect the respective market values of the lots.
