**Contribution and Schedule Lot Entitlement**

The Contribution Schedule Lot Entitlements (CSLE) for the scheme are not equal. As required by s48 of the Body Corporate and Community Management Act 1997, the CSLE for the scheme have been allocated having regard to:

- (i) the structure of the scheme;
- (ii) the nature, features and characteristics of the lots in the scheme; and
- (iii) the purpose for which the lots are used.

On the basis of these factors it is just and equitable for there to be a variation in the CSLE for the Scheme. Each lot starts with an entitlement of 500 and additional entitlements are added to recognise the above factors. Consequently the CSLE for each Lot varies between a minimum of 670 and a maximum of 1380. The relative difference in lot entitlements recognises that the factors stated above do not impact on how much each lot should contribute to certain Body Corporate costs such as secretarial fees, audit fees, printing postage and outlays, but the structure of the scheme and the features and characteristics of the lots result in a differential burden on the costs of the Body Corporate for repair and maintenance of the common property.

When allocating the lot entitlements to be included in the CSLE, each of the above factors stated above impacts on the allocation in the following ways:

**Structure of the Scheme**

The scheme is a Subsidiary Scheme within a Layered scheme arrangement. Most of the common facilities (swimming pool, BBQ area, Gymnasium) are part of the principal scheme. This scheme is liable to contribute to the maintenance of the common property of the principal scheme in accordance with the contribution schedule in the principal scheme's CMS. In allocating the contribution schedule lot entitlements for the lots in the subsidiary bodies corporate the original owner determined that no adjustment should be made to the lot entitlements on account of the costs payable to the principal body corporate. That is all lots should contribute equally to these costs.

**Nature, Feature and Characteristics of the Lots in the Scheme**

The Body Corporate is part of a Building Format Plan and is responsible for the repair and maintenance of common property within the scheme. This includes the foyers, lifts, external walls and windows, roof, utility infrastructure and utility services. In allocating the CSLE the following features or characteristics of lots in the scheme increase the burden that the lot places on the Body Corporate expenditure for the maintenance, cleaning and repair of the common property on the following basis:

- (i) the external surface area of the lot. Additional entitlements are added depending on whether the lot has small, medium, large or extra large external surface area.

Title Reference

- (ii) the level of the building on which the lot is situated. Additional entitlements are added depending on the level of the building in which the lot is located. The higher the lot in the building, the higher the cost of maintaining, cleaning and repairing windows and external walls, and the higher the cost of maintaining and operating the lifts.

**The Purpose for which the Lots are used**

Each of the lots in the scheme are used for residential purposes and consequently this factor does not contribute to any differences in the lot entitlements.

**SCHEDULE B EXPLANATION OF THE DEVELOPMENT OF SCHEME LAND**
