Deciding principle

The contribution schedule lot entitlements (CSLE) for the Scheme have been decided using the equity principle as defined in the *Body Corporate and Community Management Act 1997* (Qld) (**BCCM Act**).

Principles for deciding the contribution schedule lot entitlement for a lot

1. The CSLE for the scheme are not equal. As required by s 48 of BCCM Act, the CSLE for the scheme have been allocated having regard to:
 - (a) The structure of the scheme;
 - (b) The nature, features and characteristics of the lots in the scheme; and
 - (c) The purpose for which the lots are used.
2. On the basis of these factors it is just and equitable for there to be a variation in the CSLE for the scheme. The relative difference in lot entitlements recognises that the factors stated above do not impact on how much each lot should contribute to certain body corporate costs such as secretarial fees, audit fees, printing, postage and outlays, but the structure of the scheme and the features and characteristics of the lots result in a differential burden on the costs of the body corporate for repair and maintenance of the Common Property.
3. When allocating the lot entitlements to be included in the CSLE, each of the above factors stated above impacts on the allocation in the following ways:

- (a) **Structure of the Scheme**

The Scheme is a subsidiary scheme within a layered scheme arrangement. Some of the common facilities are part of the principal scheme. This scheme is liable to contribute to the maintenance of the common property of the principal scheme in accordance with the contribution schedule in the principal scheme's CMS. In allocating the contribution schedule lot entitlements for the lots in the subsidiary bodies corporate the original owner determined that no adjustment should be made to the lot entitlements on account of the costs payable to the Principal Body Corporate. That is, all lots should contribute equally to these costs.

- (b) **Nature, Feature and Characteristics of the Lots in the Scheme**

The lots in the scheme are building format lots and the body corporate is responsible for the repair and maintenance of common property within the scheme. This includes the foyers, lifts, external walls and windows, roof, utility infrastructure and utility services. In allocating the CSLE the following features or characteristics of lots in the scheme increase the burden that the lot places on the body corporate expenditure for the maintenance, cleaning and repair of the common property on the following basis:

- (i) The level of the building on which the lot is situated. Additional entitlements are added depending on the level of the building in which the lot is located. The higher the lot in the building, the higher the cost of maintaining, cleaning and repairing windows and external walls, and the higher the cost of maintaining and operating the lifts.
- (ii) Area of the lot. Additional entitlements are added depending on the size of the lot. The larger the lot the greater demand on support and shelter costs.
- (iii) Not all lots are expected to have the same number of occupants. Larger lots that can cater for a greater number of occupants have the potential to place a greater burden on common property and additional entitlements are added to reflect this.
- (iv) Not all lots enjoy the visual amenity of features within the common property and additional entitlements are added depending on the visual amenity enjoyed by the lot.

- (c) **The Purpose for which the lot entitlements for a lot**

Each of the lots in the scheme are used for residential purposes (except any lot set aside for any on site caretaker and letting agent) and consequently this factor does not contribute to any differences in the lot entitlements.

Principles for deciding the interest schedule lot entitlements for a lot

The interest schedule lot entitlements reflect the respective market values of the lots.
